

VICTORIA (THUY) MAI-WOODS

(346) 332-5987 | thuymaiwoods@gmail.com | [LinkedIn](#) | [Github](#) | [Portfolio](#)

TECHNICAL SKILLS

Languages: Java, C++, C/C#, SQL, JavaScript, TypeScript, HTML5, CSS3, XML

Web Development: Spring Boot 4, ReactJS, Spring Security, Node.js, Hibernate, Tailwind CSS, Bootstrap 5, Lombok

Databases & Reporting: MySQL, SSIS (SQL Server Integration Services), MySQL Workbench, relational database design, normalization (3NF)

Tools & Platforms: Excel, Visual Studio, VS Code, IntelliJ, Git (TortoiseGit), Maven, Apache Tomcat, Docker, AWS, JSON, Jenkins, Zustand

EXPERIENCE

Web Developer, Petite Estates

Jun 2025 – Aug 2026

- Collaborated with team members to translate internal requirements into technical designs, then implemented and maintained the resulting production of web applications.
- Developed object-oriented backend services in Java and Spring Boot, writing clean, maintainable code to realize system designs for web-based database applications.
- Built an internal front-facing website in ReactJS, JavaScript, HTML5, and CSS3, designing user interfaces that improved usability and interface functionality for staff.
- Improved the efficiency of SQL-based management reports and automated data gathering and scheduled report delivery using SSIS, eliminating recurring manual reporting work.
- Utilized Docker to ensure applications run consistently across different environments during testing and stable deployments on AWS.

Administrative Assistant, Houston Housing Authority

Feb 2023 - Dec 2023

- Received completed reports from colleagues, reviewed them for accuracy, and ensured that data in the system had been completed, logged, and updated for client files.
- Developed and managed departmental filings (including purging files).
- Assisted clients with language barriers, ensuring effective communication.

PROJECTS

Student Management System | Java, Spring Boot, Hibernate, MySQL, AWS

Aug 2026 - Present

- Built a Java backend and RESTful API with Spring Boot and Spring Data JPA (Hibernate), implementing CRUD operations and MySQL integration for student, course, and grade records.
- Tested POST, GET, PUT, and DELETE requests in Postman with JSON to create, read, update, and delete records.
- Designed the relational MySQL schema and enforced data integrity constraints across courses and grades.
- Deployed and hosted the application on AWS, managing data structures and tuning for production-level performance.
- Utilized Redux Toolkit to reduce boilerplate code and to track and simplify user actions.

Thuytiepie Hotel Management Database | MySQL, Database Systems

Feb 2026 - May 2026

- Produced a technical design for a hotel management database, authoring select, update, and delete scripts to exercise full system functionality.
- Eliminated transitive dependencies to achieve Third Normal Form, preventing deletion anomalies and ensuring a maintainable, high-quality data architecture.

EDUCATION

Bachelor of Science in Computer Science

Expected December 2026

University of Houston – Downtown
